Cast shadows on the columns from the Millennium Windows

I have 3 stained glass installations represented in Church, Health and Education for the State of Queensland.

My first was opened by the Queen and the Duke of Edinburgh in 2022 and my daughters were the official flower girls for the Millennial Windows special occasion at St .

My second window was commissioned by Brisbane Grammar School for their Great Hall that was built in 1880. The theme was to portray the schools ideals and is now amongst other famous stained glass craftsmen from the ages.

My third was contracted by the Queensland Government and is installed at the Royal Brisbane and Women's Hospital.
This window is quite different to 'the normal' perceptions of the thought police. I juxtaposed wooden carvings into the stained and fused glass because I wanted a tactile response in the intimate non denominal chapel. I designed it to be unique!

This is the very reason why my presentation was unanimously selected by the stakeholder committee. HOWEVER, after it was installed, the faceless nigel nobodies in the public service arts army, wanted me to deinstall it and refund the payment. After much mind numbing, energy draining, time wasting meetings to justify the rationale, I finally won and yet nobody was held into account or responsible for their erroneous intervention. Again, art academics not evolving from rigidness of the perceptions.
